NOVEMBER 30, 2027**

Dear Dr. Wan:

On November 30, 2022, Wetlands Division staff of the Environmental Protection Commission of Hillsborough County (EPC) inspected the above referenced site in order to determine the extent of any wetlands and/or other surface waters pursuant to Chapter 1-11, Rules of the EPC. While onsite, EPC staff reviewed the limits of the previously approved wetland survey (January 19, 2016). EPC staff determined that the previously approved wetland limits are still valid.

Please allow this letter to document that the staff of the Environmental Protection Commission (EPC) has issued a formal determination as to the existence of any wetlands and other surface waters upon lands within Hillsborough County for the above referenced property, as reflected on a certified survey. The extent of wetlands and other surface waters was established using the methodology described within Chapter 62-340, Florida Administrative Code, and adopted into Chapter 1-11, Wetlands, Rules of the EPC of Hillsborough County. The survey shall remain valid for a period of five (5) years from the initial date of approval (expires November 30, 2027).

Within the limits of the City of Temple Terrace, setbacks are required around each delineated wetland area pursuant to the Section 12-665, City of Temple Terrace Code. Development within the wetland setback, or development which adversely impacts the setback is prohibited per the Temple Terrace Code unless otherwise specifically permitted through the City of Temple Terrace. Pursuant to the Temple Terrace Code, larger setbacks are required from the Hillsborough River. The setback line should also be shown on all future plan submittals.

Please be advised, due to the current State assumption of the federal Section 404 Clean Water Act program, all wetland and other surface water boundary delineations accepted by the EPC will be subject to future State review prior to being accepted by the Florida Department of Environmental Protection or the Southwest Florida Water Management District. EPC lines may not be accepted by the State and will

be subject to future modification by the State agencies. The delineation of the boundary will be based on the same wetland or other surface water methodology adopted in Section 62-340, Florida Administrative Code, however, the lines must be field verified by the State prior to being accepted under the 404 program.

Please be advised that an approval on the survey does not constitute approval for any other aspect of the EPC's review process. Any activity interfering with the integrity of wetlands and other surface waters, such as clearing, excavating, draining or filling, without prior written authorization from the Executive Director of EPC or a designated authorized agent, pursuant to Section 1-11.07, Rules of the EPC, would be a violation of Section 17 of the Environmental Protection Act of Hillsborough County, Chapter 84-446, and of Chapter 1-11, Rules of the EPC.
